Aishwarya Jain

PRODUCT MANAGER
TECHNICAL PRODUCT SPECIALIST

Product-focused professional with 3+ years of experience working closely with engineering, design, and business teams to deliver scalable digital products. Proven ability to translate business requirements into user-centric solutions, manage end-to-end product lifecycles, optimize workflows, and drive data-backed decisions.

Experience

2022 - Present
Repos Energy | Pune, India
Associate Frontend Engineer ➔ Product-Focused Role

Functioned as a product owner proxy, collaborating with cross-functional teams to design, build, and optimize business-critical applications.

Product & Business Impact

- Owned **end-to-end order flow** for customer applications, from requirement gathering to release, improving transaction success and user experience.
- Led the **partner application revamp**, identifying user pain points, defining product requirements, and coordinating UI/UX redesign.
- Conceptualized and delivered a **custom internal CRM system**, streamlining operations, task tracking, and internal communication.
- Designed a**dmin dashboards & analytics tools**, enabling leadership to make faster, data-driven decisions.
- Worked closely with backend teams to define **API contracts**, workflows, and edge cases.
- Played a key role in **payment gateway integration**, ensuring secure transactions and accurate cash-flow tracking.
- Actively participated in **Agile ceremonies**: sprint planning, backlog grooming, reviews, and retrospectives.

Stakeholder Collaboration

- Coordinated with product owners, designers, backend engineers, and business teams.
- Translated business requirements into actionable user stories and technical tasks.
- Ensured on-time delivery with quality and scope control.

Key Achievements

- Improved operational efficiency by managing and optimizing **order lifecycle & payment workflows**
- Reduced development delays by implementing **Agile best practices**
- Recognized internally for **UI/UX and product usability improvements**
- Delivered scalable internal tools adopted across teams

Certifications & Learnings

- Complete Web Development Certification
- Ongoing self-learning in:
  - Product Management
  - Agile Frameworks
  - User-Centered Design
  - Business Metrics & KPIs
